

MSc Project Tips

Things to Ponder

- 1. Objectives:** For each listed objective, can you convincingly show how you will achieve it? What the deliverable will be?
- 2. Deliverables:** What will be the final deliverable of your project?
- 3. Literature Review:** is your literature review up-to-date, relevant, linked to the problem to be solved? Have you correctly referenced in terms of content, context and citation?
- 4. Key Components:** What constitutes the key components of your research?
- 5. Mapping Project Elements:** Demonstration of a direct mapping between the various key elements of your project?
- 6. Promises vs Deliverables:** Is your project feasible or you are making unrealistic assumptions? What data you require for your project and where to obtain it?
- 7. Documentation:** Is your project documentation/report consistent, current and of the quality required?
- 8. Supervisor Consultation:** Have you regularly consulted your assigned supervisor? What is the evidence of your discussion?
