

ETIOLOGY, EPIDEMIOLOGY, CLINICAL AND
PATHOLOGICAL PRESENTATIONS OF EDEMA DISEASE
AND EDEMA DISEASE-LIKE SYNDROMES OF PIGS IN
KENYA

A thesis submitted to University of Nairobi in fulfillment of Doctor of Philosophy degree
in Veterinary Pathology

DR KARANJA D. NJUGUNA (MSc, BVM; University of Nairobi)

Department of Veterinary Pathology, Microbiology and Parasitology,

Faculty of Veterinary Medicine,

University of Nairobi.

February 2010

ACKNOWLEDGEMENT

I wish to convey my sincere gratitude to the University of Nairobi for the opportunity to carry out this work, the waiver of fees accorded and the financial support through the Deans' grant. Without this support, this work would not have been done. I also wish to thank my University supervisors; Professors Ngatia T A, Bebora L C and Wabacha J K for their guidance. Their concerns which were raised during the progress reporting sessions, their immeasurable inputs in time as well as tangible materials contributed to successful completion of this work.

Many thanks go to my colleagues for their moral, material and technical support. To mention a few; the materials I received from Prof Maingi N and Drs Waruiru R M, Makanya A N and Kiama S G went along way in supplementing the Deans grant. I am also grateful to Dr Ombui J, PHPT for allowing me to use his research equipments and some reagents for PCR. I am indebted to Dr Chege J N who assisted me greatly in helminthology and Dr Kuria J K N who occasionally assisted me in identification of some of the bacterial isolates. The support of the technical staff, Mr Otieno R O, Mary Mutune, Zachary Munene, Jackson Gachoka, Mukiri John, Gucema M, Muongi J and Nduhiu G (PHPT) cannot be ignored or assumed.

I wish to recognize the moral support I received from all members of Department, the many caring enquiries made concerning this work really kept me going. To my colleagues pathologists, I wish to acknowledge the many porcine cases they referred to me during their scheduled necropsy duties that boosted the number of cases. I am grateful to clinicians who referred cases for post mortem examination; in particular, Drs Abuom and Ndurumo who voluntarily linked me up to farms with active cases. The co-operation I received from pig farmers and their animal attendants is deeply appreciated. I am equally indebted to my family for understanding and support during the time of this work. The sacrifices made to make this work a reality cannot be taken for granted.
