3) PROFILE SUMMARY FOR DR. MADADI

I hold a PhD. Degree in Chemistry from the University of Nairobi, where I am a Lecturer of Chemistry. My PhD thesis was on “Pesticides and Phosphorus Dynamics in Lake Victoria Basin” aimed at establishing the fate and transport of pesticides and phosphorus in the Lake Victoria drainage Basin and its net effect on the Lake water quality. To date I have published 11 peer reviewed papers, two book chapters and two papers in peer reviewed proceedings. I have drafted 18 key reports and made 29 conference presentations. Currently I have graduated 2 PhD candidates while 6 are ongoing. I have also graduated 18 MSc. candidates and 15 are ongoing at different levels of research. My professional consultancy contributions to the University through MOUs and income generating activities amount over 10 million Kenya Shillings from 2013 to 2021. I am a member two key Departmental Committees. As part of community outreach I chair the Technical Committee on Pesticides and the Kenya Bureau of standards, I am a members of the Chemical Steering Committee under the Ministry of Environment and Natural Resources, and I am also the regional coordinator for the Implementation of the Global Monitoring Plan in Africa under the Stockholm Convention on Persistent Organic Pollutants coordinated by UNEP.

Since 2007, I have been strongly involved in implementation the activities of the Multilateral Environmental Agreements, especially the Stockholm Convention, where I have participated in specialized workshops, training activities and also discharged various national and regional responsibilities. Recently contributed to drafting of; 1) the first, the second and the third POPs monitoring report for Africa Region on implementation of the Global Monitoring Plan in Africa under the first effectiveness Evaluation of the Stockholm Convention in 2009, 2015 and 2021; 2) The Africa Review Report on Chemicals. “A comprehensive regional status review towards environmentally sound Management of Chemicals in Africa”. The report was prepared for UNIDO in September 2009.

At national level, I have contributed to: 1) Development of the National Situation Analysis on Management of Public Health Pesticides in Kenya, in 2008; 2) Preparation of the Situation analysis for the implementation of the Libreville Declaration, in 2009; 3) Development of the National Plans of Joint Action for implementation of the Libreville Declaration in Africa, 4) I was also involved in the implementation of the Strategic Approach to International Chemical Management (SAICM); 5) Participated in preparation of the Kenya National Chemical Profile, and 6) in 2013, I participated in the updating of the Kenya National Implementation plan for Management of Persistent Organic Pollutants under the Stockholm Convention where I coordinated the development of the report on Research, monitoring and public awareness creation on POPs in 2015. I am also the National coordinator for the monitoring of Persistent Organic Pollutants in ambient air in Kenya and spearheaded establishment of five monitoring stations in Kenya namely, Kabete, Mt. Kenya, Dandora, Industrial area and Kitengela. I have developed competencies in several analytical techniques such gas chromatography (GC), High Performance Liquid Chromatography (HPLC), LC/MSMS, Mass Spectrometry (GC/MS), High Resolution GC/MS (GC/MS/MS), Ultra-Violet-Visible (UV-VIS) spectroscopy, Infrared Spectroscopy (IR) and Liquid Scintillation radio tracer technique.

I am currently spearheading research on persistent Chemicals, development and testing application of passive sampling techniques in air and water, Inorganic gases such as SO₂, HNO₃, NO₂, Heavy metals and Mercury (Hg) in ambient air, water, soils, biotic media and products. At global level, my emphasis is geared towards spearheading the Kenyan team in

supporting International Conventions on Chemicals, particularly the Stockholm Convention on POPs and the Minamata Convention on Mercury.

Our research group has established global links with other universities including the Department of Civil and Environmental Chemistry at the University of Illinois in the USA, where I have had two fellowships and worked on development of strategies for understanding disinfection mechanism for waterborne pathogenic viruses in drinking water. I have also established research links and collaborations with the Chinese Academy of Sciences; Masaryk University Brno Czech Republic, UNEP; UNDP; and the Ministry of Environment and Natural Resources among other organizations.
